Malware Command Intelligence Platform · Deterministic · Offline-first

NivXRay Analyst Report

Report Field	Value
Product	NivXRay MCIP
Engine	orchestrator-v1
Schema Version	1.0
Report Format	PDF (deterministic, metadata-stripped)
Input Length	1170 bytes
Layers Decoded	3

Executive Summary

Deterministically decoded 3 layer(s): extract-wrapper → base64-decode → xor-brute. Identified family: ****Meterpreter/MSFvenom stager**** (85% confidence). MITRE ATT&CK: T1059.001, T1027, T1027, T1055.012. IOCs: 1 ips. LOLBAS usage: powershell.exe. Verdict: ****malicious**** (risk 95/100).

Verdict

Field	Value
Verdict	MALICIOUS
Risk Score	95 / 100
Terminal	family-identified
Stopping Reason	Family 'Meterpreter/MSFvenom stager' identified with 85% confidence — stopping recursion at terminal state.
Elapsed	1182 ms
Engine	orchestrator-v1

Why This Score

Source	Points	Evidence
family-match	+55	High-confidence family: Meterpreter/MSFvenom stager (85%)
mitre	+32	4 MITRE technique(s): T1027, T1055.012, T1059.001
iocs	+4	1 IPs, 0 URLs, 0 domains extracted
lolbas	+4	LOLBAS usage: powershell.exe
Total (capped at 100)	95	

Malware Family

Field	Value
Family	Meterpreter/MSFvenom stager
Confidence	85%
Evidence	Shellcode prologue matched: MSFvenom x86 reverse_tcp/https stager

Decode Timeline

#	Plugin	Conf	In→Out	Time	Why
1	extract-wrapper	95%	1170→1112	0ms	Wrapper detected: FromBase64String
2	base64-decode	85%	1112→834	0ms	Base64 alphabet fit, length mod 4 == 0, len=1112
3	xor-brute	65%	834→834	1171ms	Binary payload (834 bytes, entropy 7.15) — brute-forceable

Indicators of Compromise

IPs (1)

- 149.28.81.19

MITRE ATT&CK Mapping

Technique	Name	Tactic	Source	Evidence	
T1059.001	Command and Scripting Interpreter Execution	Execution	PowerShell	archetype	[Convert]::FromBase64String() wrapper
T1027	Obfuscated Files or Information	Defense Evasion		archetype	Base64-encoded PowerShell payload
T1027	Obfuscated Files or Information	Defense Evasion		heuristic	XOR-obfuscated payload recovered; downstream magic: MSFvenom
T1055.012	Process Hollowing	Defense Evasion		heuristic	Detected MSFvenom x86 reverse_tcp/https stager — typical injection

LOLBAS Detection

Binary	Technique	Evidence
powershell.exe	T1059.001	[Convert]::FromBase64String wrapper

Recommended Investigation Steps

1. [HIGH] Block and hunt for outbound connections to: 149.28.81.19

IP indicators extracted from decoded payload.

2. [CRITICAL] Trigger IR playbook for Meterpreter/MSFvenom stager

High-confidence family match (85%).

Plugin Execution Report

Layers run: 3 · Total time: 1182 ms · Budget: depth ≤ 12, branches ≤ 3, wall-time ≤ 5000 ms (used 1182 ms).

Layer	Plugin	Outcome	Conf	Reason	Time
0	extract-wrapper	accepted	95%	high-confidence transform	0ms
1	base64-decode	accepted	85%	high-confidence transform	0ms
2	xor-brute	accepted	65%	soft improvement	1171ms
